(Graag 'type Narvi Softy elektrische saunakachel' vermelden.)

The sauna heater can be provided with a stylish corner installation frame.

Stonet

Stylish re-design!

The elegant Narvi Stonet is ideal for modern saunas. Stones distributed over a large surface create a massive steam area to enjoy moist, silken steam. Thanks to low safety clearances this sauna heater also fits excellently in small sauna rooms.

The heater comes complete with a control unit that can be installed in the steam room or an ancillary room. The length of the supply cable of the control unit is 3 meters. An electronic thermostat enables adjustment of the sauna temperature within an accuracy of one degree.

Control unit included!
